

PORT FOLIO PORT FOLIO PORT FOLIO

about

Since 1998, Departement-S has been shaping global, multi-market events with a distinctive sense of refinement — blending creativity, precision and elegance, whether for large-scale productions or bespoke private moments.

In response to the operational, financial and regulatory challenges of international productions, the agency has progressively developed a strategic presence in Germany and Spain, while operating extensively across several key European markets, including Austria, Portugal, Italy and France.

The agency has also developpe its presence in South America, with a particular focus on the Brazilian and Argentine markets.

As a human-scale agency, Departement-S combines agility, operational rigour and in-depth local expertise, enabling us to provide tailored support and high value-added solutions to our clients.

The agency supports projects at every stage, either globally or selectively. At an early phase, we act as a strategic partner to agencies and brands, supporting the tender processes, securing project feasibility, and optimising financial and intra-community VAT structures within a fully compliant regulatory framework.

Agency Manager

dna

The history of a company reveals far more than a simple journey. It shapes its culture, its standards and its vision — it is its DNA.

Departement-S was founded on a friendship and a personal challenge embraced by its founders.

Its growth and long-term sustainability have been built on a constant commitment: a passion for the craft, a relentless attention to detail, the ability to continually surpass expectations, and a deep-rooted belief in human values that are often overlooked.

The combination of these principles defines who we are and what differentiates us. A sincere, committed and rigorous approach that we consistently bring to every project — and that our clients recognise, seek and value over the long term.

Brand promotion and distribution

Analysis and reporting

difference

Operational bridge

We reduce your risk on the ground. We have the local knowledge to handle permits, logistics and supplier management that no freelancer or remote team can replicate.

Transparent pricing, always

We charge for our time and our team's work. No inflated supplier costs. No hidden margins. You pay for our expertise, and nothing else.

We'll find the impossible

We'll find you that elusive pink elephant !
If it can be sourced, we will source it !

Available when you need us

Trust and reliability is important to us. When you need us, whether last-minute, across time zones, or under pressure, we're there.

Dedicated to your event

Unlike a DMC that might deliver 30+ events per year, we limit the number of events we do to give each one the time, attention and resources it needs.

markets

One relationship. Six markets. Zero misalignment.

Managing a multi-destination programme through a different local partner in each country multiplies your operational risk with every market you add. Different briefing styles, different financial structures, different standards of transparency, and no single point of accountability when something doesn't go to plan.

Working with us across markets means one set of working norms, one pricing model, one contact who understands your agency's / company's culture and your expectations.

Local expertise varies by country. Reliability doesn't.

Germany

Our most established market. Active since the late 2000s, with delivery experience spanning car launches, UEFA and FIFA activations, Formula E promotions and congress productions for 500+ guests across Berlin, Munich, Hamburg, Stuttgart, Düsseldorf and Cologne.

Austria

A natural extension of our German operation. Through a curated network of trusted partners in Vienna, we deliver Austrian events with the cross-border continuity that international agencies expect from a single regional lead.

Portugal

Delivered through our long-established Portuguese partner agency. We work across Lisbon, Porto and Cascais with full local infrastructure on the ground.

France

France is more than a market to us, it's almost a second home. Years spent living and working there gave us an instinctive understanding of its culture, business etiquette and creative spirit. From high-profile productions in Paris, including a UEFA final, to events in Cannes, Lyon and other key destinations, we operate with the ease of a local and the perspective of an international agency.

Spain

On the ground since 2005. From the Mutua Madrid Open to brand activations across Madrid, Barcelona, Sevilla and the Balearic Islands, Spain is a key market for us and where we have developed our strongest local relationships outside Germany. It's also the only country outside Germany where we operate through a locally registered legal entity.

Italy

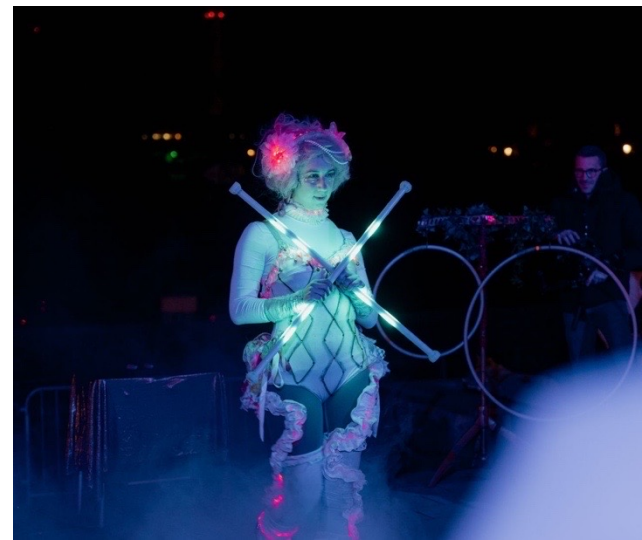

Part of our European reach through a long-established network of trusted local partners across Rome, Milan, Florence and Turin. We've been at the table for several Italian productions and stand ready to mobilise a full local team when the brief calls for it.
